

H. GIBSON GETS HIGH PRICE AT CALGARY HORSE SALE

At the Calgary Spring Horse sale held last week Mrs. H. Gibson was the owner of the high priced animal, sold on the second day of the sale. This was a beautiful mare and Mr. Gibson deserves great credit in fitting the horse for the sale.

Mr. Wilson of Calgary purchased this animal, which will be shipped to New Brunswick.

Harry also sold another good animal, going to Art Tekoe of Pickering, Ontario.

WESTERDALE NOTES

A very enjoyable evening of what was held at the home of Mr. and Mrs. Ben Kershaw Tuesday of last week when 10 tables of what were played. Prize winners were Mrs. J. Schrader and Mr. F. Moore. Consolation winners were Mrs. L. Jones and Mr. S. Murphy.

The next whist party will be held at the home of Mrs. J. Schrader, with Mrs. L. Jones as joint hostess. The National Film Board picture show will be held Thursday, March 21 at 8 p.m. Film program. Feature subject and added shorts. These shows are real interesting and educational. They are free and every body is welcome.

A good crowd attended the dance last Friday. Tickets were drawn for the table cloth and dolly set were raffled by Westerdale Willing Workers. Billy Johnson of Hartman picked the lucky tickets and Marlene Bolton won the table cloth while Miss Irene Langdale won the dolly set.

The travelling library from the Department of Extension, U. of A., had a successful year when about 40 books were borrowed from the library.

The Irish Stew Dinner, Program and Bazaar will be held this Friday evening. Dinner will be served from 6 p.m. to 8.30 p.m.

Miss Irene Langdale spent the week end at the home of Mr. and Mrs. Roy MacNaughton of Melvin.

NEW FEE ANNOUNCED TO ENTER NATIONAL PARKS

From April 1 to October 31 the new entrance fee for automobiles to the Banff, Jasper, Yoho and the Kootenay National parks will be \$2 and this will give the guest a season's permit.

Previously the fee was 50 cents for one trip or \$2 for the season, but under the new regulations there is no alternative. Season permit for a car with trailer is \$3, as it is for a single trip.

From Nov. 1 to March 31 single trips will cost 50 cents for a car and 50 cents extra for a trailer.

THE DIDSBURY PIONEER

VOLUME 43: NUMBER 11

DIDSBURY, ALBERTA, WEDNESDAY, MARCH 13, 1946

\$2.00 A YEAR: 5c A COPY

REGULAR MEETING OF KNOX SENIOR W.A.

The regular meeting of Knox United Senior W.A. was held at the home of Mrs. Ruth Eckel with a good attendance of members and visitors. Mrs. Bruce Parker presided and plans were complete for a St. Patrick's Day tea to be held on Saturday afternoon, March 16th in the church basement.

Also final arrangements were made for a congregational social evening to be held in the church on Thursday, March 28th to which all members and adherents of the church, especially newcomers to the district, are invited.

A little gift was presented to Mrs. Crouse, who has left to reside in Calgary.

FALLEN TIMBER NOTES

A movement is on foot to establish a local telephone system in the district. It will surely be a boon to the residents.

Friends of Mrs. P. J. Fair report that she is enjoying her visit at Bellingham, Wash.

Ken Mullen is busy sawing logs on his new mill location.

Mr. C. C. Cheshire made a business trip to Calgary on Monday night.

The district is getting more like New York every day. Caterpillars, bulldozers, trucks and oil drilling machinery can be seen or heard almost any time in the 24 hours.

Johnny Hayes is reported to be conconvalescing in the Didsbury hospital.

Bill Monsey and Raymond McMullen are making a record for themselves handling logs in the bush.

John Cooper made a flying trip to Calgary last Friday.

Mr. and Mrs. Joe McGaffin visited on Sunday last with Mrs. McGaffin's relatives at Carstairs.

Social Credit people in the district do not approve of the stand Mr. Fallow and his engineers have taken in the Cochrane roads. Some people think that if the Minister and his engineers could spend about six months "twice a year" in local improvement districts, that they would understand road problems better than they seem to now.

DIDSBURY HOSPITAL BIRTHS

Born to Mr. and Mrs. Geo. Lutkhouse on Wednesday, March 6, a girl.

To Mr. and Mrs. M. Peterson on Monday, March 11, a boy.

To Mr. and Mrs. Paul Houser on Tuesday, March 12, a girl.

NOTES FROM THE EAST

Mr. and Mrs. Walter McCulloch are moving to the farm of Wm. McCulloch Monday, March 11. Also Mr. and Mrs. Otto Bittner moved to their new farm which they have purchased from Ed. Blaine.

Mr. Joe Odion of Lethbridge, Alberta, spent a few days visiting with his daughter Mrs. Harold Shells, prior to taking in the Calgary horse show.

A great many farmers from far and near gathered at Calgary to spend an enjoyable holiday at the horse sale. Some of those present from the East were Joe Fulkert, Mike Shaw, Billy Coates, Capt. and Mrs. Page and Chas. Fobbes and son.

The dance held at the Lone Pine hall was a booming success. It has been mentioned by many of those present that the Lone Pine district must be belated to enlarge their hall to accommodate the increasing attendance.

The Lone Pine W.I. was very well represented at the Red Deer Conference this week. Those present from the East were: Delegates Mrs. J. Clark, Mrs. W.H. Coates, Visitors were Mrs. B. Woods, Miss Cook, and Mrs. E. Eckel.

Mrs. Ralph Viney has been visiting and caring for her mother, Mrs. W.R. Coates, who had the misfortune to fall and hurt her collar bone and shoulder. While there appears to be no bones broken her Coates Sr. has been confined to her bed since the accident which occurred about a week ago.

Mr. and Mrs. Ivor Weber and family were Sunday visitors with her mother, west of Olds.

Mrs. Marie Coates has copies of her song "Victory to The World."

Those interested phone 1411.

WESTCOTT NOTES

Mr. and Mrs. Harry Levagood spent the past week in Calgary.

On Tuesday night last this community gathered again at the Dageford rink to enjoy another evening of skating. The ice was good inspite of the warm weather. Mr. Dageford surely is to be commended highly for the interest and care he's taken all winter long in providing this fine entertainment. We certainly wish to thank him and Mrs. Dageford for the kind hospitality shown us all through the season.

Another successful whist party was held at the Westcott school last Wednesday evening, at which the honors went to Mr. Don McLaren for the gentlemen and to Mrs. Ed. Klinck and Mrs. Ray Benson tying for first place in the ladies. The issue was decided by the drawing of the highest card in which Mrs. Benson won consolation awards.

Miss June Klinck who took the part of a gentleman, and to Mrs. E. A. Trussler for the ladies.

Mrs. E.A. Trussler was a week end visitor in Calgary.

The Programme and Box Social held at Westcott school on Friday evening last was a big success with a very good crowd in attendance.

The Programme was made up of various numbers and there were many beautiful and artistic boxes sold. All in all, a really fine entertainment which young and old alike enjoyed.

Mr. and Mrs. Homer Laccisic and baby Arthur of Wetaskiwin are visiting latterly parents Mr. and Mrs. Alex Snyder. We understand the Alex Snyder family will be leaving us soon to make their new home east of town.

Roads are in quite bad shape and especially side roads as with the warmer weather, the snow banks don't carry you up as they did when it was colder, however, we don't mind, maybe one of these days the snow will all be gone and then what will we have to complain

about.

The Box Social and entertainment sponsored by the Didsbury West Calf Club at the Westcott school was well attended and the sum of \$138.55 was realized. The club wishes to thank all those who contributed baskets and who gave cash donations, as well as those who helped with the entertainment and auction.

The first box was bought by Mr. Hugh McPhail, district agriculturist, who had given a short talk on club activities at the close of the program.

The next meeting of the club will be at the farm of Mr. Jim Hughes the evening of April 5th.

Didsbury To Have Water & Sewage

Didsbury isn't going to be a "jerk water" much longer, thanks to the progressive policy of our town council and the tax payers who elected and supported their representatives, for at the polls Monday tax payers of Didsbury gave their approval to the By-Laws which will provide funds to instal waterworks in our town.

Returning Officer F.L. Evans has released the following results of the ballots.

For The By-Laws 157
Against the By-Laws 20

Out of approximately 220 eligible voters, which includes a number of non-resident electors, 177 turned out to the polls on Monday, which is probably a record for Didsbury in percentage of votes cast, and the result indicates that the people strongly favor the immediate installation of waterworks.

88 per cent of the proprietary electors favored modern conveniences.

Now that the By-Laws have passed it is to be hoped that nothing will be left undone to start immediately on the installation of the water system.

To those who voted against the By-Laws it is hoped that they will now fall in line with the majority of electors and boost for the system and its completion in as short a time as possible.

BURNSIDE NOTES

Walter McCulloch is wearing a large sized smile today. He is moving in to the home of his childhood.

Mrs. Shultz had the misfortune to slip on the cellar steps and injure her back.

We are sorry to hear that Mrs. Wm. Smith had to return to the hospital last week for further treatment.

Mr. and Mrs. Toby Schartner and family of Schartner Ave. Bergen, spent the week end at their Sunny-side residence.

Bill Shultz and Grenville McCaig left Monday for Calgary with a load of cattle.

Mr. Nielsen and his wife, who managed the Jack Boulton farm this winter, have accepted a position with Walter McCulloch on the old McCulloch place.

Ed Liesemer is a patient in the local hospital suffering from the flu.

Mr. and Mrs. Tom Findley of Calgary are visiting at the Shultz farm this week end. Tom, who has been ill for some time, expects to leave shortly for an extended trip to the coast and U.S. points.

Mrs. Idaris Jenkins, who was operated on at the Holy Cross recently, is progressing as well as can be expected and her daughter "Patsie" is visiting with her uncle and aunt on the farm.

We are pleased to hear that Mrs. Dawson is to succeed her husband (the late Enoc Dawson) as manager of the Neapolis store. She is not without experience, and with Rex's help on completion of his university term the store should be well operated.

The Box Social and entertainment sponsored by the Didsbury West Calf Club at the Westcott school was well attended and the sum of \$138.55 was realized. The club wishes to thank all those who contributed baskets and who gave cash donations, as well as those who helped with the entertainment and auction.

The first box was bought by Mr. Hugh McPhail, district agriculturist, who had given a short talk on club activities at the close of the program.

MELVIN NEWS NOTES

Quite a number of local people attended the Calgary Horse Sale last week.

Word has been received that Bob Youngs has been posted to Winnipeg for discharge. Allan Chandler has been assigned to the ship Qu'Appelle which is, as yet, jetty bound.

On Monday evening the A.F.U. sponsored several bridge and whist drives, the proceeds in aid of the Didsbury Memorial Hall. The following are the results:

Bridge at Mrs. Annie Krebs—Winners, Mrs. Ace Ealer and Mr. O. Thompson. Consolations: Mrs. E. Klein and Mr. Howard Krebs. Amount raised, \$6.50.

Bridge at Ross Youngs—Winners, Mrs. E. Dupont and Ed Ford. Consolations, Mrs. A. Schneidmiller and Doug Landeen. Amount raised \$6.50.

Whist at Zella School—Winners, Mrs. A. Hogg and Mr. O. Blain. Consolations, Mrs. B. Smith and Mr. J. Hughes. Amount raised \$5.50.

Whist at Lloyd Chandler's—Winners, Mrs. F. Leeson and Mr. D. Janzen. Wandering prize, G. A. Youngs. Consolations, Mrs. G. A. Youngs and Carleton Leeson. The amount raised was \$4.75.

Whist at Zella School—Winners, Fred Jahneke (as a lady) and Harold Braun. Consolations, Catherine Egans and E. Gourdine. Amount raised \$7.75.

Total amount received \$31.00. The A.F.U. wishes to thank all those who so generously supported the effort.

The A.F.U. will meet again on March 20 at the home of Mr. and Mrs. Lloyd Chandler.

MRS. MARION STOCKEL DIES IN LOCAL HOSPITAL

Mrs. Marion Stockel, 67, Didsbury, died Wednesday morning in Didsbury hospital.

Born in Belfast, Ire., Mrs. Stockel moved to the Didsbury district four months ago. She had previously lived west of Innisfail for 29 years.

Her husband, Frederick, died in October, 1942.

Surviving are two sons, Fred and George, both of Didsbury; two daughters, Mary, Didsbury and Mrs. Ruth Lewis, Vancouver.

Rev. D. Whyte-Smith officiated at private services at Didsbury funeral chapel, Friday at 1.30 p.m. Graveside services were held at Innisfail cemetery at 3.30 p.m. Gooder Brothers funeral home in charge of arrangements.

The World Food Crisis

THE MOST SERIOUS PROBLEM which has arisen since the end of the war is the world food shortage, which has become increasingly critical during the last few months. In the past, starvation and plague have very often followed in the wake of war, but it was hoped that this time, means might be found to avert disasters such as these. The world has now been put, however, that it is facing the greatest food crisis in modern times, and that even with a maximum effort on the part of those nations which have food to export, sufficient supplies are not available to provide adequately for all the people in Europe and Asia between now and the next harvest. Great Britain, Canada, the United States and other countries which are able to export food, have taken measures to increase shipments abroad, but even their best efforts cannot be expected to completely alleviate the present crisis.

Attributed To
Many Causes

The world shortage of cereals is one of the most serious aspects of the food situation. This shortage is attributed to many causes. Lack of meat, fats, and other foods has increased the use of bread and cereals in Europe. At the same time, due to the devastation of war, the average sown in wheat and cereal crops on that continent has been greatly reduced. In addition, adverse weather conditions caused these crops which were sown in Europe last year, to be one of the poorest in history. The annual per-capita wheat crop in Europe averaged some forty-two million tons, while this year the yield was estimated at only about twenty-three million tons. Drought conditions in many parts of the world, and a widespread shortage of fertilizers during the past two years have also contributed to the present scarcity of cereal grains.

Appealed For
Prompt Action

The Canadian Wheat Board recently announced that supplies of wheat in farmers' bins in this country were only about half of what they had been a year ago, but it appealed for prompt delivery of available wheat to elevators, to be made up for shipment overseas. It is estimated that the world wheat deficit for the first half of this year will be over five million tons. By the time of the next harvest, stocks of wheat are expected to be almost completely exhausted, and needs for next year will have to be met almost entirely from the current crop. Reports issued by the Emergency Economic Committee for Europe show that over two hundred and forty million people are now expected to exist on a diet far lower than the 2,650 calorie minimum set by the U.N.R.R.A. authorities. Under present conditions hunger and starvation is the lot of these people, and it will be impossible for them to escape disease, which always attacks under these circumstances. The people of all countries who are in a position to export food, will be called upon to make many sacrifices until the world situation improves, but those who will not act will not be able to do all that is possible to relieve the present crisis abroad.

Cattle Vaccine

**Canadian Short-horn Association
Pass Resolution**

A resolution asking the Dominion government to make available to approved veterinarians, free of charge, the vaccine used to inoculate cattle against tuberculosis was passed at the annual meeting of the Canadian Short-horn Association at Winnipeg.

It also suggested that a certificate of vaccination be furnished to the owner of each cow infected.

However, should the Dominion government not establish such a policy, the meeting asked that the provinces be given the authority permitting recognition of provincial certificates as export trade.

Auspiciously of the association's resolution would eliminate the necessity of blood tests in exporting cattle to the United States. Present vaccination is not recognized by that country because it is not carried out by approved veterinarians.

RUB OUT THAT
COLD
WITH—

**MINARD'S
"KING OF PAIN"
LINIMENT**

In Great Demand

**Boom In Diamonds Has Far Exceeded
Expectation Of Dealers**

LONDON.—Expectations that the end of the war would bring a repetition of the 1919 boom in diamonds have proved to be an understatement. Demand for the gem is described as "unbelievable".

It is reliably learned that the diamond syndicate has adopted a new policy of adjusting its selling prices of rough diamonds in accordance with the ruling market prices.

Well-informed diamond traders expect further price increases later in the year.

A surprising feature of the boom is that the demands for industrial diamonds, which was universally expected to dwindle as war industry was demobilized, is almost insatiable.

NOT USED BY COLUMBUS

When Columbus discovered America the continent had no name. He thought he had reached a western part of India, so he called the islands in the Caribbean Sea the West Indies. The name America came from Amerigo Vesputi, a traveller from Florence, who visited that country four years after Columbus. By the settlers America was not used by Columbus.

WORKING IN REVERSE

It was in 1963 that the first horse brought to Canada from France was disembarked from a sailing ship at Tadoussac. It was presented to the Governor of New France, Augustin de Saffray de Mély, by the settlers. Now horses are going in the other direction.

Price Control
And Rationing
Information

Q.—Is there to be a cut in the butter ration for the months of March and April?

A.—Canadians will be obliged to accept a reduction in their butter ration from six to four ounces per person per week during March and April. During these two months the coupons will become valid for each month on the following dates:—March 7 and 21 and April 4 and 18.

Q.—Have the purple butter coupons been declared invalid?

A.—The purple butter coupons expire on February 28. The "R" coupons will be used for purchasing butter.

Q.—Are priority suit certificates transferable to another party?

A.—The certificate issued to veterans for the purchase of a suit is not transferable and must not be accepted by a merchant in exchange for a suit if it is known that the person offering it is not the rightful owner.

Q.—I'm expecting visitors from the States and would like to know if I will be able to get ration coupons for them.

A.—If your guests will be staying for five days or more, they should apply to your district local ration board and ration coupons will be given them to cover the length of their stay.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book of ration coupons, to the office of your rationing officer, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

GEMS OF THOUGHT

CALMNESS

Calmness of mind is one of the beautiful jewels of wisdom. It is the result of long and patient effort in self-control. —James Allen

Serenity of mind and calmness of thought are a better enjoyment than anything without us. —Benjamin Whitchead.

Waves of serene life pass over us from time to time, like fakes of sunlight over the fields in cloudy weather. —Henry D. Thoreau.

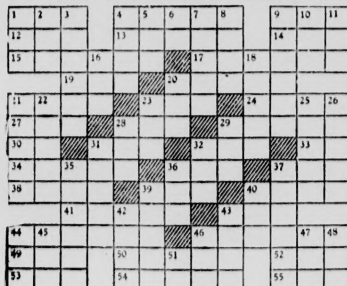

The secret heart is devoting temple; there the saint lights the flame of perfect sacrifice, which burns unquenched and unimpaired. —Mahatma More.

The soul-inspired patriots heard the voice of Truth, and talked with God as consciously as man talks with man. —Mary Baker Eddy.

How calmly may we commit ourselves to the hands of him who bears up the world. —Richter.

Put To Good Use

Wedding Party In England Did Not Throw Rice

It is difficult for the average citizen in this hazy continent to realize just how short is fed across the Atlantic. Perhaps this little story, from the Northwestern Miller, may help.

Some time ago, in Ipswich, England, Lt. John Holbauer of Milwaukee, Wis., wrote his parents of his coming wedding to an English girl. Shortly afterwards he received a package from home which contained the rice that had been thrown at his parents' wedding more than 20 years ago. They had saved it to be tossed at their son's nuptials. It wasn't tossed at the young couple when they left the house, however, but it did appear at the wedding as a rice pudding.

Nobody throws away rice or any other food in England. —Financial Post.

Wider Markets

United Nations Food And Agriculture Organization May Solve Problem

All the peoples of the world some day may be adequately fed and farmers of all countries will have wider and more stable markets because of the United Nations' food and agriculture organization. H. H. Hanson, president of the Canadian Federation of Agriculture, told the 40th annual convention of the Ontario Association of Agricultural Societies at Toronto.

Outlining the objectives and problems of the F.A.O., Mr. Hanson said the organization was founded in the belief that the needs of many people and in no country have all the people enough to eat and the great productive capacity of most countries might be brought together and coordinated to the advantage of both producers and consumers.

"If this could be done within and among nations it would solve most of the world's economic ills."

FILM SHOWINGS

To Help Solve The Problems Of Canadian Farm Women

One of the chief aims of the National Film Board's Rural Circuits is to help solve the problems of Canadian farm women. As part of this program a new film, "Kitchen Come True," is being shown in the rural areas of Canada to demonstrate how the old-fashioned farm kitchen may be transformed into an attractive and convenient center for housework. "Kitchen Come True" shows that on many farms where the barns and agricultural machinery are up-to-date and efficient the housewife is still carrying on her domestic work with the methods and equipment of her grandmother. In this film the drawbacks of a typical old-style kitchen are pointed out, and ways of eliminating them are described in detail. Suggestions are given for the arrangement of furniture to save steps, for the provision of adequate cupboard space and for getting rid of the common source of dirt and catch-all for rubbish.

Several of the improvements shown in this film depend on the availability of hydro power. Films on rural electrification such as "Valley Of The Tennessee," which the National Film Board has also shown on its rural circuits, are consequently being distributed to encourage this first step towards better living conditions on the farm.

The ideas demonstrated in most of the films shown on the "Rural Circuits," however, may be more easily carried out than these large scale plans. Canning methods, meal planning and the preparation of school lunches are among the subjects received. District Health Economists frequently speak at showings of films connected with their special interests.

Besides bringing information and new ideas to the individual housewife, the Rural Circuits are making a contribution to the social life of women in farming districts. Women's Institutes in many communities are sponsoring the film showings, which have become a monthly feature of their programs. Special showings are also arranged on request for Home and School Associations and other organizations in which women play an important part.

Much Better Coffee
For Canadian Users

Made Possible By Science In The Roasting And Packing Processes

Statistics show that Canadians are drinking much more coffee than in previous years. Before the war, the average was four pounds a year per person, now it is about six pounds. Quite an increase although it does not seem to compare with consumption in the United States, where they use about eighteen pounds a year per person.

There may be many reasons for the increase in Canada, but undoubtedly it is largely due to the better quality and better flavor of coffee which Canadians enjoy today, made possible by the many improvements which science has brought to the roasting and packing processes. Science is constantly being carried on in such modern plants as the manufacturing establishment of H. L. MacMurray Co. Ltd. at Winnipeg, where Melrose Coffee is roasted and packed, with the result that this delicious coffee compares favorably with the finest coffee produced.

For instance, scientific research has shown that much of the delicate flavor of coffee was being lost in the old-style roaster, in which the heat came into direct contact with the coffee beans, and from that was absorbed by the new Melrose low-temperature roasting process by which the heated air is carried into revolving cylinders in which the beans are kept constantly turning. This process is used at the Melrose factory, and produces a bright, nut-brown coffee with a most delicious and appealing flavor.

Another great stride in the speed with which the roasted coffee is sealed into airtight containers. Science asserts that 85% of the flavor of coffee is lost in the first twenty-four hours after it is exposed to air, or to be exact, to the oxygen that is in the air we breathe. And again, science has found a way to replace this ordinary air with air that contains no oxygen during the packing process, so that the full roaster flavor of Melrose Coffee is sealed into every package until it reaches the cup.

The package itself, made of Laminated paper with a film of rubber and glass in between, laminated together under heat. This packaging is so airtight that even after immersing a package of Melrose Coffee in water, no test, no moisture reached the coffee.

It is interesting to see what modern science in a laboratory can accomplish to bring the full enjoyment of this stimulating beverage to the home.

NEEDS MORE FIGURING

The Kitchen Record thinks it will be quite a trick for those observers of atomic bomb tests to determine how close they can get to the blast to see what happens and still survive to tell what they observed.

IF HEAD COLDS
HANG ON..

DO THIS! To relieve discomfort, one of the best things you can do is put a good spoonful of home-tested Vicks VapoRub in a bowl of boiling water.

Then feel welcome relief come as you breathe in the steaming medicated vapors that penetrate to the cold-congested upper breathing passages, soothe the irritated throat, quiet coughing, and help clear the head—bringer of relief.

FOR RAPID RELIEF... Rub throat, chest and back with Vicks VapoRub for hours—2 ways to ease to bring relief from distress.

Remember, it's Vicks VapoRub you want.

HAS DIVINE TASK—Albert John

Bertrand Watrous, Ont., a former butcher and proprietor of meat markets, now turned evangelist, preaches he is going to "take over the world." Arriving in Niagara Falls, Ont., with enough baggage for a platoon, Bertrand, in his middle thirties, claims his mission is to bring peace to the world. After that, he says he will become "king of the earth." The mission, he asserts, has begun now and Niagara Falls is the starting-off point. From this city he intends to go to Toronto, Ottawa and various other centres, preaching his gospel of peace. One of his most precious possessions is a simple little apparatus for "purifying" drinking water. Wherever he goes, his gadget goes with him. The apparatus consists of an ordinary flower pot filled with charcoal and earth through which tap water is filtered and then becomes "pure, hard and fit to drink," he maintains. Before consuming the water he "blesses" each glassful. He says he will preach his mission first in Canada and then go on to other countries all over the globe.

NOT A GOOD IDEA

One of the nation's giant corporations proposes to produce new varieties of alarm clocks in 1946 that will awaken people "gradually and enticingly." The idea should be put in cold storage to await the next Era of Good Feeling, says the Chicago Sun. This year the citizenry, both public and private, needs alarm clocks which clang with a loud, snoring note, irritating one and all into leaping from bed into full days of working and thinking hard.

The human hands are capable of a hundred combinations of movement for every one that a horse's hoof can make.

Civil Aviation Agreement Signed By United Kingdom And U.S. For Expansion Of World Air Traffic

LONDON commentators observe that the Civil Aviation Agreement between Britain and the United States signed at Bermuda on the 11th of February is regarded in certain United Kingdom quarters as providing for Anglo-American co-operation and friendly competition in the expansion of world civil air traffic on terms which afford Britain and the United States the highest possible common measure of mutual satisfaction.

The Agreement reconciles the different lines of approach by which the United Kingdom and United States Governments had been actuated in their Civil Aviation policy before the Bermuda Conference, and which served as directives to their delegations when they sat down at the Conference table in Bermuda on the 15th of January.

These two concepts were defined by the United Kingdom Minister of Civil Aviation, Lord Winstanley, in the House of Lords on the 12th February as follows: Britain desired to ensure that international air services were developed on an orderly basis, which would eliminate wasteful competition and uneconomic subsidies. The United States desired to avoid regulation which might be construed as restrictive on air traffic to the full extent, starting from the principle that it is essential to stimulate air travel at economic rates and that the air carriers of Britain and the United States should have fair and equal opportunity to operate between their two territories, matching the facilities supplied to public roads.

The Bermuda Conference worked out agreements on the three cardinal questions of rates, frequencies and fifth freedom rights.

Firstly, rates. It is agreed that rates shall be controlled to prevent undercutting. Undercutting leads inevitably either to lowering the quality of service or to "subsidy wars". All fares of mutual interest to Britain and the United States will be subject to mutual agreement. The United States will for the first year recognize the International Air Traffic Association, which represents the operators, as a rate fixing body. Meanwhile, the American Civil Aeronautics Board will seek powers from Congress to control air rates in the future. This, it is felt, in London, is a considerable advance on the position taken by the United States right up to the Bermuda Conference.

Secondly, frequencies. The Agreement recognizes the freedom of each country to determine the frequency of operations of its own airlines. But this is an important qualification: it is agreed that the capacity of traffic to be operated on any route shall be related to the amount of traffic offered. And to preserve this relationship, the volume of traffic will be brought under constant review jointly by the Ministry of Civil Aviation and Civil Aeronautics Board.

Thirdly, the fifth freedom rights—the right to carry traffic picked up at intermediate stages on international trunk routes. This right is recognized under the agreement, but it is laid down that the enjoyment of the fifth freedom rights must correspond to the dictates of economy and to two basic requirements. These are, traffic requirements between two terminals of trunk routes and traffic requirements of intermediate areas. In the latter connection, it is agreed that the amount to be paid to local and regional services.

Finally, it is agreed that any dispute between the United Kingdom and United States Governments about the interpretation of the Bermuda Agreement shall be referred to the International International Civil Aviation Organization (I.C.A.O.) for an Advisory Report.

In addition, opportunity was taken in Bermuda to discuss arrangements for turning over to civil use air bases in the Western Hemisphere leased by Britain to the United States for military purposes during the war. Tentative agreement was reached on the approval of the United Kingdom and United States Governments, by which the leased bases at Bermuda and Antigua, St. Lucia and British Guiana will be opened for full civil use, while similar articles in Trinidad and Jamaica will be made available for civil use as and whenver it is possible to arrange such airports.

The United States Government has stipulated that its final approval of this agreement concerning air bases in the West Indies is conditional upon the conclusion of a satisfactory agreement covering air bases in Labrador and Newfoundland. Such an agreement necessitates discussions between the United States, Canadian and Newfoundland Governments.

For some time it has been known in London that the policy agreed upon at Bermuda is a policy of ordered freedom through competition. Both sides made comments showing readiness to depart from the rigid orthodoxy of their respective beliefs.

The Agreement is, however, a vital link in the chain of Anglo-American freedom co-operation which is being forged over a wide field.

Lord Winstanley felt justified in declaring in the House of Lords on the 12th of February: "I cordially welcome the Agreements, which go

far to resolve many points about which this country and the United States were previously in disagreement."

Sir Henry Solf, Head of the United Kingdom Delegation, speaking at the ceremony of signature in Bermuda, looked forward to "A vast expansion of air services in conditions which will serve the public interest and in which both British and American airlines will be in friendly competition."

Mr. George Baker, Head of the United States Delegation said: "I believe that the cooperation begun here augurs well for the future of civil aviation between our two Nations, and we hope for the development of civil aviation throughout the world."

Faster Than Sound

World Promoted Airplanes To Travel Thousand Miles An Hour

Thousand-mile-an-hour airplanes will be annihilating distance by or before 1960, reducing the travelling time between New York and London to a mere 2½ hours.

That is the promise of the National Advisory Committee for Aeronautics, U.S. Government's organization for aviation research.

The committee opened its laboratories at Langley Field, Va., for the first time in six years to members of the Aviation Writers' Association. This invasion of the supersecret speed range faster than the speed of sound will bring radical changes in the design of planes to reduce drag.

The wings of the 1,000-mile-an-hour plane, for instance, will sweep back from the fuselage at a forty-two-degree angle, making them V-shaped.

In wind tunnel tests speeds up to 1,400 miles an hour have been attained.

The N.A.C.A. opened its fantastic layout of 23 wind tunnels, 13 laboratories and numerous shops.

These tunnels range from the enormous full-scale tunnel where actual aircraft, up to medium-sized attack bombers, are used, to the small supersonic tunnel where models are tested at 1.2 and 2.5 times the speed of sound.

There is the 2,000-foot-long tank for testing supersonic and another smaller tank where three-foot waves are produced for impact tests.

Many of the tunnels are devoted to the improvement of safety factors. Design changes resulting from these tests have saved many a model before it reached the production line.

During the war the N.A.C.A. was wholly occupied in developing the fastest and best military planes from the lack of research.

Inevitably construction caught up with research.

New, fundamental research is again under way and its nonmilitary engineer or scientist will admit that there is no limit to the speeds that can be attained.

The manufacture of dyestuffs from coal tar originated in England.

The ashes of an unknown Canadian soldier, rescued from a shattered and burnt-out tank by Maj. Rev. Robert Currie Creelman, recently returned padre of the Presbyterian Church at Weston, Ont., are now resting in his church and may become the central symbol in a national memorial to Can-

Aid To Biologists

New Type Violet Ray Microscope Demonstrated At Moscow

A new ultra-violet ray microscope which makes it possible to detect the tiniest organisms and observe their reactions under different conditions was demonstrated to Soviet scientists meeting at the Soviet Academy of Sciences in Moscow.

An improved electron microscope also was shown.

Living tissues, substances colorless to the human eye, and undyed chemical substances are revealed in different colors under the ultra-violet ray microscope, making it possible to detect their presence in any preparation.

A report on it says: "It is particularly valuable for biologists, who will be able to use it to delve into the tiniest organisms and observe the changes taking place in cells under various conditions. All these processes will be revealed by instantaneous changes in color under the microscope."

When an electron microscope is used to study bacteria the electron stream kills them immediately. Under ultra-violet rays, however, they can live for an appreciable space of time, giving biologists an unprecedented opportunity to observe the changes that take place in tissues on the borderline between life and death.

"Metallographs and mineral glaze most likely will be able to make extensive use of the new microscope in studying chemical reactions."

STATION HAS BIBLE

Travelers entering the waiting room of the Southern Railway station at Sandhurst, in Surrey, Eng., will find a large Bible on the bookshelf over the fireplace. On the Bible is written: "Presented by two frequent travellers from this station with the hope that its message may help other travellers on life's journey."

GOING MODERN

Gibraltar residents shortly will be come liable to income tax for the first time in the 242 years during which "the rock" has been under British rule.

Boon To Navigators

Recent Test Proves Radiobeacon Would Be Effective In Open Sea

Obviously there are many valuable uses for radiobeacons in pacific seas, and one of them is navigation at sea. The British Admiralty carried out a very interesting experiment last Friday, when the radiobeacon ship Pollux, was successfully sailed along the Thames without mishap. The Thames is a tortuous river, even between London and the North Sea 60 miles away, and many ships are anchored in mid-channel. But the Pollux was navigated without bumping a single ship, the weather that ordinarily would have held up shipping.

The radar device is affixed on the bridge or in the chart house below and is effective to a range of 20 miles. There are very few contrals required to operate the set and no special radar expert is required to handle it. A panel records every obstacle in the way, including the buoys marking the navigation channel and also outlines the coast on both sides.

While this experiment was made in a narrow waterway it showed that radar would be effective in the open sea. Echoes would be revealed with in a range of 20 miles. Had radar been available in 1912 the Titanic would not have been sunk by a berg on her maiden voyage. St. Thomas Times-Herald.

AIR RAID STORY

During an air raid a policeman plunged into the ruins of a house to rescue someone trapped in the basement, and after a short time managed to crawl out with his man. He was covered in mud, grass, and plaster.

"Gosh," said an A.R.P. man, going to his assistance, "you are in a mess."

"Yes," drawled the policeman, "that's the worst of navy blue it shows every little stain."

Cockroaches can eat practically anything, including paint, and like the earliest record of an "April Fools Day" was in England in 1712.

Most Helpful Ally Yet Found In The Battle Against Weeds Is A New Chemical Discovery

What George Knowles, Weed Control Expert, Field Husbandry Division, Central Experimental Farm, Ottawa, believes is the most helpful ally yet discovered in the battle against weeds is a new chemical known as 2-4-D, which is the contraction of 2,4-dichlorophenoxyacetic acid. His belief follows the encouraging results of a series of elaborate experiments carried on in Ottawa and at several other Dominion Experimental Farms in cooperation with 15 north central states of the United States.

In Ottawa the experiments disclosed that one application of the powerful new chemical, which the manufacturers say will be on sale in quantities in Canada early in the spring, will kill many weeds, more effectively than any other chemical. It will also kill dandelions and most other weeds found in lawns, without injury to the grass. It does, however, temporarily eliminate clover, but the clover gradually grows again without reseed.

When 2-4-D was used on Canada Thistle in grain crops, did not completely kill the vigorous weed, it was so badly set back that it did not reappear until nearly harvest time, and then only in the form of young shoots. Practically the same results were obtained on field bindweed growing in a field of oats. Just how many applications of 2-4-D will be required to spell sure and certain death to Canada Thistle and field bindweed in grain crops is yet to be determined.

When annual weeds, such as mustard, lamb's quarters, and red top, are sprayed with the new weed killer, they are killed out as completely as Hiroshima was by the Atomic bomb. As an example of this, Mr. Knowles says a dense growth of mustard growing in an acre of grain was eliminated by an spraying of 120 gallons of liquid that contained less than four-quarters of a pound of one of the preparations containing 2-4-D. Amazingly the new devastating weed killer does not perceptibly injure the plants of the grass family, which includes wheat, oats, barley and rye.

If 2-4-D is used on a lawn around a flower garden, Mr. Knowles advises the exercise of considerable care or some cherished plants may be damaged, for there is still much to learn about the new wonder weed killer.

Discovery of 2-4-D was made by a group of scientists in the United States in 1942 while experimenting with hormones or growth stimulants. Over-stimulation it was found, killed some plants, one of which was field bindweed. The news of what 2-4-D did to bindweed caused great interest among agricultural scientists everywhere and plans to carry on experiments on their weeds have since been carried out at several points in Canada and the United States.

If additional experiments with 2-4-D give as encouraging results as those which have already been disclosed, farmers may be able to wage more successful war against weeds, which cost them many millions of dollars annually.

SOUNDS FRIENDLY

Complaints that the British civil service was too remote from the public have produced results. Japanese Rackets

Why Promoters Get Rich-Quick Scheme Did Not Last

Conniving Japanese are busy cooking up rackets to trim their more glibly countrymen and American soldiers, but the occupation army is giving them a rough time.

Army intelligence operatives in Kiamoto prefecture discovered that wily promoters of one get-rich-quick scheme were trying to corner all available swords, sabres, pistols and rifles.

The promoters told the Japanese residents something like this: "New look, Yumura San. You have a sword but no money. GI bayonets today for 2,000 yen (131¢). Swords are getting scarce. You put sword in our tank. Pretty soon comes rainy day and you sell for 2,000 yen (131¢). Make sense?"

Kiamoto folks thought it did and they trotted in with their weapons. 19,661 swords and sabres, 4,225 rifles and pistols.

Intelligence men investigated reports of an "arsenal" and decided the whole thing was non-military because the promoters had neither ammunition nor hostile intention—just a bull market.

The monopoly was dissolved and the "swords" were collected by Japanese police.

HELP THE RED CROSS IN ITS PEACE TIME PROGRAM

While there will not be a national campaign of the Canadian Red Cross Society in 1946, the local branches of the Society have been requested to conduct a membership drive, as a means of raising the necessary funds to carry on the work of the Canadian Red Cross Society in its peace time objective. These activities include blood donor clinics, outpost hospitals, destitute and emergency relief, aid to the crippled childrens' new hospital in Calgary, and many other calls made almost daily on the Red Cross for assistance.

The membership fee is \$1.00, but this sum will not provide sufficient funds to carry out the peace time objective of the Red Cross. Therefore, when taking out your Red Cross membership card, you are urged to contribute as much as possible, over and above the \$1.00 membership fee.

When the canvasser calls, be generous with your Red Cross donation.

MRS. F. A. FINLAY WRITES FROM AFRICA

Share, Via Jebba, Nigeria, West Africa.

Dear Mr. Rouleau:

Last week Ruth's air letters arrived telling of my father's death and funeral. I had received the word by cablegram three days after his sudden call. I wish in this letter to thank all the friends for their kindness to us as a family at this time. All those who did so much to help Ruth and Bessie. To the neighbors, friends of the town, the Springdale district and of the church. I had always desired to be with my father when his call came, but it must be better this way. I at least am proving a good testimony to the people we serve here as we speak of such a death and our assurance of Eternal Life yonder.

Ere I left Didsbury I desired to thank those who were so very kind to me while I was at home, especially in the building of our new home in town. Time did not allow me to do this, so I do it now from Nigeria.

Our trip here was quite pleasant. We flew all the way and that meant five different planes. First with Pan America Land Plane, then with P.A.A. sea plane. The others were Army Transport and R.A.F. We had Christmas with the Armed Forces at Gold Coast.

Weather here is very hot. Water scarce and we find prices very high. My first Pioneer arrived last week and I read every word of it.

Again thanking you all.

Yours faithfully, (Mrs.) F. Finlay.

NEWS FROM THE WEST

Mr. and Mrs. Reg. Sissons, the latter an English war bride recently arrived, visited the former's sister Mrs. H. Hoesgood over the week end.

Mrs. J. Hoesgood, Mrs. Alex. Blain, Mrs. O. Krebs, and Mrs. A. L. Hogg of the Rugby W.I. Mrs. Faas and Mrs. McFarlane of the Westcott W.I., and Mrs. Shultz of Cremona were among those from the west who attended the W.I. District Conference in Red Deer. All W.I.'s in the Didsbury constituency were represented except Mountain View, but only the official delegate from the east had the honor of being taken to the station by the Mayor of Red Deer. The Conference was voted a great success, with about 200 delegates in attendance and it was decided to hold another one in two years time again in Red Deer, as this is the most central point.

Mrs. A.L. Hogg spent Friday night visiting Mr. and Mrs. F. Steveneth of Innisfail, returning on Saturday afternoon.

A whist drive was held Monday evening at the home of Mr. and Mrs. H. Hoesgood.

Mr. and Mrs. A.L. Hogg received word from overseas of the marriage of their second son LAC Colin Hogg to Ann Duff of Edinburgh, Scotland, the wedding taking place in the Church of Scotland, Edinburgh, Friday Feb. 8th. The reception was held in the beautiful Paldin hall where the guests of honor received congratulations and were presented with a gift from the management. The honeymoon was spent visiting the groom's relations in Aberdeen and later in London.

Mrs. Royman returned home Sunday after being in the Didsbury hospital for several weeks.

Mrs. D. Evans returned home on Sunday after having spent the past two weeks with her daughter, Mrs. P. Hoesgood.

"I like the parrot," said a lonely man. It is the only creature gifted with the power of speech that is content to repeat just what it hears without trying to make a good story out of it."

CARE OF BABY CHICKS

Clean houses and yards, clean litter, good feed, careful management, together with a little common sense, are the essentials in handling baby chicks in order to prevent losses, says B. F. Tinney, Dominion Experimental Station, Charlottetown, P. E. I.

Everything should be in readiness before chicks arrive. Too often no preparations are made until notice of arrival is received from the express agent. Brooder houses should be thoroughly scrubbed down—floors, walls, ceilings and disinfected previous to the arrival of the chicks. All drafts must be eliminated. Leaky roofs must be repaired and made tight. Corners of the brooder-house floor should be rounded off with wire or boards to prevent crowding or piling. Floors should be covered with clean, dry, litter. Clean sand, chopped straw, planer shavings, or, for from the barn floor, are excellent. The farmer, clover head leaves, etc. Litter should be changed whenever it becomes dirty or wet.

The brooder stove should be operated for several days before the arrival of chicks and a check made to see that the controls work effectively, and adjusted to maintain a temperature of 95 to 98 degrees, two inches above the floor at the edge of the hover. Do not guess the temperature, but use a thermometer. Temperatures after the first few days may be lowered about five degrees, per week, as the chicks grow older. Uniformity in temperature is essential. Rapid changes will cause over-heating, or chilling with disastrous results.

A good brand of commercial starter is less likely to give trouble than home-mixed feeds and when followed up with growing mash will give good results. The manufacturer's instructions should be followed carefully.

Chicks should not be fed until they are about 48 hours old. Adequate feeding space for all chicks should be provided. For the first week or ten days, feed five or six times daily. Leave the feeders before the birds for about 15 to 20 minutes at each feeding. Changes should be made gradually to a good growing mixture.

Be careful not to overcrowd chicks. It should be noted that brooder ratings are based on day-old chicks and a 500-chick brooder should not be expected to handle its full rating after the birds are several weeks old. When ready to range see that clean land is provided and on which birds have not ranged for at least three years. Cleanliness and good management practices are the watchword and if these are observed, success should follow.

SOCIALISM EXPLAINED

An old story is going the rounds in Ottawa, a story that in view of recent election results is very timely. The story goes as follows:

The late Baron de Rothschild once had a valet named Alphonse, an excellent man whose only fault (in the baron's eyes) was his following after Socialism. The man was a sedate, harmless person, whose demonstration against his master's Capitalism amounted to nothing more than weekly attendance at a meeting of Socialists, and so the Baron raised no objection to his political faith.

One week, Alphonse failed to attend the meeting. The Baron thought he might have forgotten the night, but when next week Alphonse again absented himself from the meeting, de Rothschild asked for an explanation.

"Sir," replied the valet, "some of the party members with whom I was mistakenly associated have worked out a calculation that if all the wealth in France were divided equally per capita, each individual would be the possessor of 2,000 francs."

"Well," exclaimed the Baron, "what of it?"

"Just this sir," said the enlightened Alphonse, "I have 5,000 francs now."

**FIRE DESTROYS 75
RANCH BUILDINGS**

Fire, which broke out just before
8 a.m. last Thursday morning com-
pletely destroyed the fine old build-
ings of the 75 ranch west of Olds,
before sufficient help or water
could be mustered to control the
blaze.

The fire, believed to have been
caused by defective wiring, started
in the kitchen annex and as there
was only water readily available in
this room fire fighting was made
difficult.

Hired help turned their attention
to the saving of valuable personal
effects of Col. Snyder and Miss
Jensen from the rooms on the other
side of the building but were only
able to get a small number of these
effects out before the blaze reached
there too.

All that was left standing was
the chimney a sad reminder of a
fine building that was known to all
lovers of the west country.

Both Col. Snyder and Miss
Jensen were away at the time of
the fire on an extended trip to the
States but were contacted in
Milwaukee and arrived home this
week.

Numerous paintings, valuable
books, many fine mounted heads,
rifles and other valuable collection
pieces were destroyed.

The building which was semi-
modern in the interior was purchas-
ed by Col. Snyder from Mrs. R.
Brown following the death of her

MOUNTAIN VIEW NOTES

The Mountain View District met
Tuesday at the home of Mr.
and Mrs. Garnet Tighe to honor
Mr. and Mrs. Ed. Blaine who are
leaving the district after having re-
sided there for 30 years. Both Mr.
and Mrs. Blaine have been very
good neighbors to all who passed
their way and the whole district
regrets their moving.

On behalf of the assembly Mr.
Hugh Roberts presented Mrs.
Blaine with a walnut magazine
table, Mr. Blaine with a matching
smoke stand and Mr. Mrs. Everett
Blaine with a Presto Cooker.

The Mountain View Women's
Institute assisted in serving lunch.
The evening closed by singing For
They Are Jolly Good Fellows.

INVERNESS NOTES

Kenneth Mullen who was sawing
on the Fallen Timber finished his
own logs and finished Lester
Inman's first logs a week ago Satur-
day and is busy moving his sawmill
now.

A Krebs and Laverne Banting
have been hauling slabs from Ken
Mullen's sawmill.
Leona Banting is back at school
again now after being out of school
with a badly scaled foot.

Lester Inman has been helping
Dave Weiss cut logs and wood the
past few days. Dave expects to
have a mill in next summer.
Busherts have a lot of logs cut
and some hauled and expect a saw-
mill in about next June.

The weather has been nice the past
week but there is still an awful lot
of snow in the bush.

Some of the horses and cattle are
poor around here, but goats and
sheep have wintered pretty good
considering the bad winter weather
and deep snow.

husband a number of years ago.
Previous to that part of the
structure had been built by Messrs.
A. Heaton, J. Morgan and Mr. Keys
who homesteaded there in the early
1900's.

The building, commonly known as
Dick Brown's ranch home, was a
stopping place for many parties
going into the west country and the
ranch itself gave the impression
that the famous Canadian ranching
scene was an important part of
our western life.

Loss, according to reports is es-
timated between \$35,000 and \$40,000.
It is not known whether the
building will be rebuilt.

The famous "Tepee" built up the
hill from the ranch proper was not
among the buildings destroyed by
the fire. —The Olds Gazette

WORLD HAPPENINGS
BRIEFLY TOLD

The destroyers *Napier* and *Norham* arrived at Devonport, England, recently with more than 120 tons of food from Australia.

Exports of diamonds from Britain during the six weeks years brought more than £100,000,000 into the country.

The United Nations assembly will hold its next session Sept. 3 in New York city. NBC said in a broadcast from London.

Kentucky is the first state to make a legal holiday of Jan. 30, anniversary of the birthday of the late President Roosevelt.

The last census in the British East African colony of Kenya showed that there were 622,000 and 410,000 in the Nairobi district alone.

Rations for British troops in the Hong Kong area of southeast Asia would have been cut because of the world shortage of food, it was announced.

Lord Wootton, chairman of the British Red Cross society, has received the decoration of a Commander of the Legion of Honor from the French government.

Two latest additions to the King's Windsor Greys—the famous horses used on state occasions—have been named "Alexander" and "Montgomery".

Mrs. Rose E. K. Hill, personal secretary to Winston Churchill, is to be mayor at Chequers, country home of Britain's prime ministers, in succession to Miss Lamont.

Some Good Advice

Brockington Suggests People Should Stop Talking About Future Wars

Leonard W. Brockington, in an address at New York, suggested that the average person's best contribution to peace would be to stop talking about the inevitability of war—

speaking to a spokesman of the "trust division of the American Bankers' Association, Mr. Brockington said that without the support of the peoples of the United States, the British Empire and Soviet Russia, peace was a mirage.

He reviewed world events of 1816. "I feel the excitement of the time then seen in the United States, the war with Mexico, the settlement of the Oregon boundary dispute, which established the boundary with Canada at the 49th parallel, and asked:

"Don't you think when you hear that the United States was doing then, it was something like what Russia is doing today?"

Mr. Brockington said he would like to see this continent open its doors wide to the suffering who wished to make a new life here.

If we want to undermine the peace of the world we can do so only by sacrifice. Peace can be maintained only by no less effort than has been given to war."

For Future Warfare

Must Keep Skilled Personnel For The Manufacture Of Munitions

Canada must keep skilled personnel and equipment for the manufacture of munitions "fluid," it should be kept pace with rapidly changing development, Col. Malcolm Jolley, president of Canadian Armaments Ltd., said in an interview.

An industrialist-soldier at 56, Col. Jolley heads the new Crown company which will be responsible for keeping Canada industrially alert for possible war needs. Early in the war he had a leading part in building Small Arms Ltd., and he is the inventor of several small arms improvements, but he is hesitant about making commitments on the future plans of guns and bullets.

"When the war broke out we had not been given a glimpse into the future that we didn't fully understand," he said. "To me and weapons are my business. The progress was very rapid. I can't put the gun in proper perspective in relation to the atom bomb and rocket warfare."

Radio-Active Element

Government Is To Conserve Canada's Supplies Of Thorium

The government has moved to reserve Canada's supplies of thorium, a rare radioactive element, being studied as a possible source of atomic energy.

The action was taken through the passage of a customs order strictly controlling previous exemptions for the shipment of thorium and monazite sands, and rescheduling export permit required for the shipment of monazite sands containing thorium.

Prime Minister Mackenzie King disclosed in the Commons last December that Canada was exploring the possibility of using thorium as a substitute for the rarer and more expensive uranium, thus far the only element known to have been utilized to produce atomic energy.

As far as is known, Canada has no deposits of thorium, most of which is mined in India.

Canon came into use in warfare in the 16th century.

New Crown Colony

Romantic Family Saga Ended With Transfer Of Sarawak

By gift of the last "White Rajah" of Sarawak, Sir Charles Vyner Brooke, Britain is acquiring a new Crown Colony. It consists of 50,000 square miles of north Borneo, great riches of oil and rubber and, before the war, not a shilling of public debt.

The Japanese, however, managed to destroy most of its industrial equipment, and its output of oil has not yet returned to normal.

The change of government, however, will mean little change in the affairs of Sarawak. This independent state was already under British protection, its trade was almost entirely within the empire, and it was recognized from the Japanese by Australian troops. But the transfer brings to a close one of the most romantic family sagas that ever came out of the Far East. It began in 1842, when James Brooke, son of an East India Company civil servant and a soldier who had distinguished himself in the Burmese war, landed in north Borneo at the head of an expedition he had equipped at his own expense and suppressed an insurrection of head-hunting Dyaks against the reigning sultan.

Three years later the grateful sultan named Brooke the first White Rajah of Sarawak.

Since then the Brooke family has ruled Sarawak, first as absolute monarchs and later under a constitution. Sir Charles, last of the line, fled from the Japanese invaders and headed his Government in Exile in London. There he has become dissatisfied with the management of Sarawak's affairs in his absence. Now he drops his little empire and his troubles into the ample lap of the British Government. It deprives three lively young "princes" and a nephew of an "hereditary throne, but it will help the British establish a firmer foothold on the Indonesian archipelago, New Guinea.

Sir Charles, last of the line, fled from the Japanese invaders and headed his Government in Exile in London. There he has become dissatisfied with the management of Sarawak's affairs in his absence. Now he drops his little empire and his troubles into the ample lap of the British Government. It deprives three lively young "princes" and a nephew of an "hereditary throne, but it will help the British establish a firmer foothold on the Indonesian archipelago, New Guinea.

WEEKLY RATION FASHION
for a twosome

SUN.	MON.	TUES.	WED.	THU.	FRI.	SAT.
Roast Veal	Cold Roast Veal	Omelet	Curry of Veal	Broiled Liver	Fish	Individual Meat Loaves
Group B	left-over	unrationed	left-over	unrationed	unrationed	Group C
3 lbs. 2 coupons						1 1/2 lb. 2 tokens

If your ration budget indicates a credit of a couple of tokens saved from past eating, you may wish to exchange two coupons for a Sunday roast. A three-pound rolled shoulder of veal should provide for three dinners, any one of which might include a guest or two. A tasty dressing, good brown gravy and baked orange halves are excellent companions for its first appearance. And because veal is not every week occurrence, you'll doubtless appreciate it sliced cold for Monday's dinner. On Wednesday, a curried dish with noodles pinch-hitting for the scarcer rice, will revive

the remnants. Eggs, now so plentiful and reasonably priced, suggest themselves for Tuesday. Whipped into an elegant omelet, served with a colorful vegetable or fish, they will satisfy the most discriminating taste. A boon to your ration status as well as your nutritional level, would be liver on Thursday. Friday is yours for a fish selection. And on Saturday two tokens will procure half a pound of hamburger for a meat loaf mixture. To give the old standby a new appearance, bake it in custard cups or muffin tins. Then uncurl and serve individually with your favored sauce or relish.

On Paying Business

New Luna In Toronto Is Now Out Of The Red

Toronto's "White Elephant" is out of the red and into the black ink. Casa Luna, towering "dream castle" built by the late Sir Henry Pellatt from 1911 to 1914 and taken over by the city in 1927 for unpaid taxes, now is paying handsome profits. Mayor Robert Saunders disclosed.

The rambling 18-room structure in west-central Toronto, one of the city's showplaces, went on a paying basis after many lean years through public dances and tours sponsored by a service club (West Toronto Kiwanis).

Net income last year for Casa Luna—Spanish for "House on the Hill"—was \$57,000, part of which went to the city and part to the club's fund for underprivileged children.

Sir Henry, native of Kingston, Ont., collected ideas for the castle on frequent visits to Europe. He died in 1929 when his "dream castle" was just starting to pay its bills.

MUST HAVE HELP

The *Evening Standard* says: "On the farmers' field the great task of production of these essentials of life. But they can no longer rely on the less given assistance. Production is not kept up with a steadily decreasing supply of help. Careful planning on their behalf, along with the assurance of just financial returns are essential as they look out for another production season."

The supplier of seed maize will make red or blue flowers much faster in even white.

British industry is striving the use of color as an incentive to higher output. A North England cotton mill recently announced its intention to paint its looms in lime green and duck egg blue and its walls in green and light gold.

Using color

SWIFT CALCULATOR

Mathematical Robot Solves Problems In Very Fast Time

By combining a centuries-old gadget with the latest in electronics, the United States Army came up with a 30-ton monster it calls "the world's fastest calculating machine."

It may make possible more accurate weather forecasting, improved industrial products and general advances in science and engineering. The Ordnance department said in unveiling the mathematical robot described as 1,000 times faster than any other calculating machine ever built.

Known as the "eniac" for "electronic numerical integrator and computer"—this mechanical Einstein designed by scientists at the University of Pennsylvania can solve in hours problems that "would take years" on any other machine.

It can compute in one second the sum of a five-digit number added to itself 5,000 times. The Eniac also subtracts, divides, multiplies, extracts square roots, and does complex equations.

The machine originally was intended to furnish faster means of computing complicated problems of ballistics, the mathematics of weapons. Scientists say it may offer a swift calculating mechanism for weather forecasters, industrial designers, construction engineers, astronomers, research scientists and atomic physicists.

While it operates entirely by electronics, and contains no moving mechanical parts, it employs the basic principle of the "abacus" an ancient-style counting board still in use by many Chinese.

The "abacus" utilizes head-like counters strung on parallel rods or wires. The Eniac has thousands of tiny neon light bulbs, arranged in rows of 10 like the beads of an abacus.

When punched cards, containing holes corresponding to arithmetical numbers, are fed into the Eniac, the light bulbs flash on and off in proper combinations.

Fast-moving electrons, fed at the rate of 5,000 a second activate the machine, and an ingenious arrangement of electrical circuits determines whether a problem in addition, subtraction, division, multiplication or square rooting is to be done. Answers to problems pop out of the machine on other punched cards.

The machine cost \$400,000, including all research and development work, but future models could be built "much more cheaply," scientists said.

Hard on artists

Brilliant artists are handicapped by a shortage of canvas and brushes which prevents many of them from pursuing their work. It is almost impossible for any one to make a living by painting today, so drastic is the materials position, said an official of the Royal Society of Arts. "Our artists are carrying on by using the backs of used canvases."

A proton is 1,800 times smaller than an electron but weighs 1,800 times as much.

INDIA'S PART

A combined Indian-Service Historical section has been set up under the war department in India, to prepare a comprehensive history of the military achievements of India in the Second Great War.

THIS CURIOUS WORLD

By William Ferguson

NOT ONE SINGLE GAS BOMB WAS DROPPED IN WORLD WAR I. GAS WAS EITHER RELEASED FROM CANNISTERS, TO BLOW IN THE ENEMY'S FACE, OR ENCLOSED IN SHELLS AND FIRED FROM GUNS.

MOST SPECIES OF FLOWERS WOULD DISAPPEAR ENTIRELY FROM THE EARTH IF ALL INSECTS WERE ERADICATED.

IS IT TRUE THAT THE FOX TROT DANCE IS NAMED AFTER THE SOUNDING OF THE RED FOX?

ANSWER: No. It was named for its originator, a New York dancing master named Fox.

OUR COMPLETE
SHORT STORY—

OFF THE BEAM

By MARION BAILEY
Copyright
Wheeler Newspaper Syndicate

BEAMER was a short, thick little guy, with a weakness for talking fast; the minute he saw a group of boys talking together he'd jump in and over and placing a dirty hand on somebody's shoulder, he'd start off. We met Beamer on the liner coming home. At the last moment he had been pushed in our group as a replacement. There were about two hundred of us on route home. Most of the men were young, but a few older ones were there. Beamer was a bit younger than Bill and I and hadn't seen much actual fighting, although he had been with the group for quite some time. We were all feeling pretty good about getting home; that is all except Beamer. All Beamer seemed to be interested in was trying to impress the younger lads with his own compliments. To hear him talk, anyone would think that he'd won the war single-handed.

Bill, my buddy, was eyeing him. I could see Beamer was getting under his skin. "Ah, why don't you dry up," he said. "The war's over now, so why can't we forget about it?"

"I'm just making conversation," Beamer smirked. "We gotta make conversation, don't we?"

"Well, let's talk about something else," Bill suggested.

That seemed to hold him for a while, but the next morning when Bill and I went in forchow, old Beamer was dishing it out at his best. "There was hell of a lot of fighting going on that day," he was saying, "and the bossy sarge put me in a fox hole almost on top of the German front. Wouldn't you long before I saw something moving in a shell hole not fifty yards away. Well, I watched that guy for quite a while. Beamer stood for breath and looked around at his audience, to see how they were taking it. "Well, as I was saying, I watch that guy for sometime. He would pop up and down like a slow motion jack-in-the-box trying to get the load on our front. I already had my rifle over the edge and the next time that buzzard stuck his neck out I let him have it and ducked."

"Then hell broke loose. Bombs started flying backwards and forwards like tennis balls. Suddenly they stopped and you could have heard a pin drop and not a thing in sight but this Nazi he hit. Well, I thought I'd like to take a look at

the guy so I did a little snake maneuvering over to the shell hole and drops in. The guy was dead all right, he was deader than a door-nail. Got him straight through his lousy Nazi's heart, and what do you know? he had yellow hair, yep, yellow hair. He was young too, about 18. He'd been writing a letter, the letter was right there waiting to be put in the envelope. I took the letter and his gun and went back to my own post. I couldn't read the letter seeing I didn't know any German but I still got it. It's one letter some damn never got."

He reached in his pocket and brought out the letter triumphantly. It was just a small sheet of paper, roughly with handling. The younger men seemed much impressed. Beamer said: "Well, if he was writing some bluge to a dame, he sure picked a lousy spot to do it in." He began to laugh.

My stomach began to feel queer and I knew it wasn't from the roll of the ship. I'd been through all that. I looked over at Bill, he was on his feet staring at Beamer like he was going to punch him in the nose. He leaned over the table toward Beamer and put his hand out. "Do you mind, Beamer," he said, "I read the letter?"

"Sure," Beamer said, handing the letter to Bill. "Maybe we'll get a laugh out of it."

"Bill took the letter, looked at it for a moment, then began to read it out loud."

"July 14th, Dearest, (Bill began

slowly, I'm in a shell hole close to the front. Close by my enemy. I could have killed him many times in the past hour because he is not a very smart enemy, he leaves himself open to invitation. But I do not want to kill him; I do not want to kill my man. I am tired of this thing. I do not understand—for I do not understand the reason for which I am fighting. This will be my last letter, dearest, because I have decided I am going to die. In a few moments I shall advance towards my enemy hoping this time he will not miss.

Forgive me, dear, goodbye. Your husband Clark."

When Bill finished all eyes turned towards Beamer. He had gone a purplish red. He stood up and reached across the table, grabbed the letter from Bill's hand and scannned.

For a while we were all quiet, suddenly it struck me. I started to laugh. "Say, Bill, I didn't know you could read German."

"I can't," Bill said, reaching for the rail. "I just thought I'd teach that bird a lesson."

Selected RECIPES

OPEN SEASON FOR HOT DESSERTS

Cooks, unlike hunters and fishermen, are not required to observe "open" or "closed" seasons, but tastes vary with the temperature and weather appetites combine with tradition to set up a series of "seasons" for our favorite foods.

So now puddings, pump and pound, return to the tables, steamers and pots and pans for sauces emerge from the cupboard, now-swiggling aromas waft in from the kitchen and the last course of the meal is circled with wisps of steam. Yes, it's pudding time. It's sauce time. It's hot and gingerbread time. It's time for hot desserts!

Main courses may be lighter when desserts are hot and hearty, but by the same token, the size of the dessert serving may be more frugal when it is topped with a hot, spicy sauce.

Jelly Mince Pudding
2 cups prepared mince meat
1 cup of brown sugar
1 tablespoon flour
1/2 teaspoon cinnamon
3 tablespoons butter
1 1/2 cups all-weather flour

Spread mince meat in greased pan. Combine sugar, flour and cinnamon. Blend butter and sugar mixture; mix with cereal. Crumble over mince meat. Bake in moderate oven (350 degrees F.) about 20 minutes. Serve warm with cream, if desired.

Yield: 6-8 servings (8x8x2-inch pan).

(*) Sugar may be increased or decreased depending on sweetness of mince meat.

Bequerel discovered radio-activity in 1896 when some photographic film was blackened accidentally by uranium minerals.

Here's what to do. Get a bottle of BUCKLEY'S MIXTURE. Take a few sips. Feel its instant effective action spread through throat, head and bronchial tubes. It starts at once to loosen up thick, clinging phlegm, ease the cough, soothe the raw irritated membrane of throat and upper bronchial tract. Don't take chances—take BUCKLEY'S, Canada's longest selling cough and cold remedy. It's different—it's all medication—no syrup—acts faster—goes farther.

BUCKLEY'S MIXTURE
Prove Satisfactory

Square Milk Bottles Said To Save Much Storage Space

Square milk bottles may come into use within a few months. Some of the largest dairies in Ontario have changed under consideration. Milk producers and dairy managers say that at least 25 per cent. will be added to refrigeration and storage space by changing the round bottles for the square shape. Square bottles have been in use in Buffalo and in other American cities for some time, and they have been tried out in some Ontario dairies with satisfactory results.

None spoke favorably of the use of an opaque bottle of other receptacle for delivery of milk to consumers, although green or other colored glass would avoid the destructive effect of the sun's rays, destroy vitamin B2 and causing milk to sour quickly. One dairymen recalled that years ago the late Dr. Charles Hastings, M.H.O., declared that the clear glass bottle, permitting the buyer to see what he was getting was best.

Giant Fig Tree
Instructions In Will Of Owner Protect It From Destruction

A giant fig tree in the Mullumbimby district of New South Wales must never be destroyed, according to a direction in the will of the late J. T. Gray, former owner of the property on which the tree stands.

The tree, a link with the historic pioneering days, is fenced off in about an eighth of an acre of valuable land at the foot of a 4 1/2 acre patch of bananae. Present holder of the banana plantation paid \$3,354 for a six-year lease with option of renewal for a further five years. This is probably a record figure for the Commonweath.

To Feel Right—Eat Right!

How to Combat RHEUMATIC PAIN

Rheumatic pains may often be caused by excess uric acid, a blood impurity that should be excreted by the kidneys. If kidneys fail, and excess uric acid remains, it can cause severe discomfort and pain.

Treat rheumatic pains by keeping your kidneys in good condition. Get and use Dodd's Kidney Pills. Dodd's help your kidneys get rid of trouble-making poisons and excess acids—help you feel better. See what Dodd's can do for you.

WOMAN'S BODY UNDER TRUCK FOR SEVEN HOURS—Seven hours after she was killed, a woman, believed to be Mrs. Viola Stivill, of Orangeville, Ont., was taken from beneath this transport truck. The body had lain in three feet of water in a ditch near Caledon, awaiting arrival of equipment from Toronto. She was reportedly helping the driver of one truck flag another on the slippery hill.

SIFT THE EVIDENCE

Public Deluged By Opinions On Many Matters Of Public Interest

In reading news headlines or listening to radio newscasts, the public is deluged with the sound of voices being ground. Hon. Ray Atterton, United States Ambassador to Canada, said in an address before the national home of the Ottawa Medical-Chiropractic Society.

He deplored the fact the public was "deluged with opinions" by "authorities" in the form of radio commentators and columnists.

"We can't all be great individual thinkers, but by asking 'How do I know that?' or 'What evidence have I seen, read or heard about that?' We can strengthen that self-reliance that has been the keystone of our democracy," Mr. Atterton said.

In medicine "it's often the public is tried with excitement over some new drug or medical technique long before the profession accepts it."

The same situation often arose in social, political and economic fields.

News headlines should be treated with the same critical analysis people learned to apply to reports of impending disaster during the war.

"We can follow a simple rule. We can aim at gradual improvement of our methods of reaching decisions."

Mr. Atterton paid a tribute to Rt. Hon. Malcolm MacDonald, retiring British High Commissioner to Canada. During the war, he had "so thoroughly proved his worth to all people with whom he came in contact that no words can do justice to his methods of reaching decisions."

SMILE AWHILE

When your son has completed his studies, what will he be?

"Oh, about 28 years of age. I should think."

"Never waste household scraps," says a wartime economy hint.

Agreed. Open the windows and let the neighbors hear.

"What can I grow in a garden 36 feet square?" asks a correspondent. "Very, very tired."

"Isn't your friend Clark pretty slow?"

"I should say not. It took him four hours to drive his new girl friend 15 miles home from a dance last night."

The moving picture usherette was in the dentist's chair.

"Now, ladies," advised the dentist, "which tooth is giving you all the trouble?"

"Second from the left in the balcony," she replied.

"Dine 'appetite," requested the instructor in an English lesson. "When you're eating, you're 'appy, among the student; and when you're through you're tired, that's 'appetite."

The glamorous blonde was about to undergo an operation.

"Tell me, doctor," she gasped, "how long will it take the operation before I know something?"

"You wouldn't expect too much from an operation," replied the doctor.

"I had an awful headache last night."

"Yes, I saw you with her."

"Since I got a girl I can't eat. I can't drink. I can't smoke."

"That broke."

"Will you stop drinking for me?"

"Who said I was drinking for you?"

Employer interviewing applicant for job: "Know anything about electricity?"

"Yes sir."

"What's an amature?"

"A chap who boxes for nothing!"

To Be Restored

Historic Sundials Were Removed To Avoid Damage By Bombs

Sixteenth century sundials, removed during air raids from the stately gardens of Hampton Court Palace, have been restored.

Sundials were the official timekeepers when Henry VIII resided at the Palace. They were moved in 1940 because of the danger that bomb blast might bend the iron indicator, displacing the time "shadows".

Though bombs crashed around the palace hourglass, the massive stone architecture bears few scars. Of particular interest to tourists is a grape vine, 200 years old, which continued to bear fruit each year within a steam-heated greenhouse.

IMPORTANT ANNOUNCEMENT

Discontinuance of Overseas Tobacco Gift Plan

The Tobacco Gift Plan whereby BRITISH CONSOLS and EXPORT CIGARETTES and Tobacco parcels can be sent to the Armed Forces overseas will be discontinued from the 28th February, 1946. After this date no further orders can be accepted by W. C. Macdonald Inc.

Members of the Canadian Armed Forces still serving overseas are assured of an adequate supply of cigarettes as they will still be able to purchase BRITISH CONSOLS and EXPORT CIGARETTES from No. 2 Canadian Tobacco Depot, London, England in the same way as they have been doing up to the present time and at the same prices as through the Gift Plan.

OVERSEAS DEPARTMENT

W. C. MACDONALD Incorporated

Monreal, Que. 7th, February 1946

Getting Serious

Breakage In Marketing Eggs Is Causing Heavy Loss

Breakage is the greatest single cause of loss in marketing eggs in Canada. Greater shell strength is needed. It is not a matter only of the loss on the cracked or broken eggs themselves but the loss in value of other eggs and packing material through smearing. There is also the unknown loss at point of production, in the nest, in gathering, and in handling on the farm, and in the consumer's homes, according to a survey made by the Dominion Department of Agriculture.

It is not a question of whether egg shells are weaker now than before the war, but just a plain statement of fact that present egg shells are not sufficiently strong to withstand the hazards of transportation.

Trains are heavier, jolts are more severe, and handling less careful. Something has to be done now to improve shell strength. Selection, breeding, feeding can all be brought in. It is something in which all phases of the industry can take part. Eggs with thin porous shells should not be used for setting the department advises in a recent release.

Fort William Times-Journal.

Fiery, Itching Toes and Feet

There is a clean, scratch-free, itchy relief in toe trouble that anything you've ever tried.

In action is so powerfully penetrating that it is quickly absorbed and acts in a short time on the skin to soothe, calm, and relieve the itching, burning, and stinging of the feet.

You can obtain Moore's Foot Relief in the original bottle at any modern drug store or in a 25-cent tin at any grocery store or the ultimate relief above in every store.

Tuberculosis Fight

Another Step Is Taken In The Hunt To Find A Cure

Another step in the hunt for a weapon against tuberculosis is described in Science, official journal of the American Association for the Advancement of Science.

Doctors Laurence E. Gerber and Milton Gross of the Hudson County tuberculosis hospital at Jersey City report that a mold-derived substance they called "mycoxin" had removed the tuberculosis germs from human beings powerless to produce the disease in guinea pigs.

The doctors offered no statements as to any possibilities of using the substance in the treatment of tuberculosis in human beings. They said they still are working toward isolating and purifying the "active principle."

Dr. Eugene Gillespie of the U.S. Public Health Service, an authority on tuberculosis, told a reporter that "mycoxin" probably is similar in nature to "streptomycin," another mold-derived substance that has proved effective against tuberculosis germs in test tubes and animals.

EVANGELICAL CHURCH NOTES

"The Atonement" will be the theme on Sunday, March 17th at 10.30 a.m. This is the central doctrine of the Christian religion, because we believe that the blood of Jesus Christ cleanses all those who believe in Him from all sin. Sunday school will be held at 11.30 a.m., and at Bethel at 2 p.m. Pioneer Day will be observed at Bethel at 3 p.m.

Dr. W.W. Krueger of Regina, Sask., will conduct the Holy Communion service at 7.45 p.m. The Fourth Quarterly Board Conference will be held after this service. We invite all to worship with us.

IN MEMORIAM

Owen—In loving remembrance of Bert, who passed away March 9, 1944 and whose loving kindness will ever be remembered by Nancy Sleep on beloved and take thy rest.
